## INSTALLATION STEPS:

Seat SEAL [1] into under side of FAUCET BASE [2]. Feed FAUCET SUPPLIES [3], MOUNTING STUD [4] and DRAIN CABLE ASSEMBLY [8] through the mounting hole of lavatory or mounting surface.

From below, push GASKET [7] and RETAINING WASHER [5] onto MOUNTING STUD [4]. Secure Faucet with MOUNTING NUT [6], pulling faucet to front of sink, so SUPPLIES [3] rests against mounting hole. Before final tightening, make sure collar on MOUNTING NUT [6] is seated into RETAINING WASHER [5].

Adjust Faucet so that it is centered. Tighten MOUNTING NUT [6] to complete faucet mounting

### Maintenance:

Your new faucet is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will dull the finish and void your warranty.
